

History of Faith Christian School Podcast

This is Faith Christian School's 30th anniversary year. Pastor Larry Burgbacher, lead pastor of Faith Assembly of God and founder of Faith Christian School, is our guest on our first podcast.

What prompted you to want to start a Christian school?

We wanted to be able to teach our students from a Biblical Worldview. We believe that school is taught best when you have Jesus as the center of every subject that you teach.

What was your vision for the school at that time?

The vision was to eventually go through 12th grade. We started with the preschool and kindergarten to build the strong foundation and added a grade each year until we had a high school and graduating class.

What were some of the obstacles you had to overcome over the years?

Facilities is always an obstacle. We have six buildings right now that the school is using four or five of them. We had to make sure that the science lab and other facilities were state of the art to make it the best learning environment we could. Another obstacle that we need to continually overcome is technology. We need to make sure that the students have what they need to compete in today's technological world.

What would you say is your proudest moment in the school's history? Most memorable moment?

Every graduation class is a milestone. We graduate so many quality students and go on to do great things in the community. They also get accepted and get scholarships to many local and out of state colleges because of the educational foundation they received at FCS. What they do in college, what they do in the business world, what they do in the ministry is extremely rewarding.

What would you say are some of the biggest changes you have seen in the last 30 years?

We had always had a strong academic program, but when we added football, it was a very exciting day. We had a strong basketball program, and now we wanted to bring that to the football field. We wanted to not only have a strong academic program but a strong athletic program too to give our students more options to showcase their talents.

What do you envision for the future of Faith Christian School going forward?

We want to make sure that we continue to create an atmosphere that parents want to bring their students to FCS. We always want to continue to improve our technology and continue to have the spiritual fervor that the students have for the Lord with our chapels and Biblical Worldview. We want to continue to grow, so we can impact more lives for Christ.
